9.	Victoria	18
9.	Queensland	19
9.	South Australia	20
9.	Western Australia	21
9.	Tasmania	22

EXPLANATORY NOTES

This bulletin, one of a series to be issued annually, contains revised particulars of weighted average minimum weekly and hourly wage rates for adult males (by months) and adult females (by quarters) for the period January, 1960 to June, 1963, together with index numbers with base : year 1954 = 100.

2. The wage rates used in the Minimum Wage Rate Index, for representative occupations within each industry, have been derived from representative awards, determinations and agreements. In some cases when awards, etc. are varied, the new wage rates are made retrospective. Also, there is generally an unavoidable, and sometimes considerable, delay in the receipt of notification of changes in margins and loadings in respect of the occupations included in the index. Such retrospective, etc. effects on figures already published for recent months are generally incorporated in revisions made at the time of publication of detailed special Statistical Bulletins such as this bulletin.

3. Statistical Bulletin 123, "Minimum Weekly Wage Rates, 1939 to 1959" (issued on 3rd October, 1962) contains final figures of weekly wage rates for adult males for the period March, 1939 to December, 1959, and for adult females for the period March, 1951 to December, 1959. This bulletin contains final figures for the period January, 1960 to June, 1963 and includes details of hourly wage rates in addition to weekly wage rates.

4. The information contained in Statistical Bulletin 123, and in this bulletin consolidates, extends, and supersedes that previously published in Statistical Bulletins 754 (13th November, 1959), 786 (19th February, 1960) and 902 (20th February, 1961), "Minimum Weekly Wage Rates, January, 1957 to June, 1961" (30th October, 1961), and in Statistical Bulletins 124 (3rd October, 1962,) and 354 (9th January, 1964).

5. Corresponding particulars for July, 1963 and subsequent months will be found in the monthly bulletin, "Wage Rates and Earnings," commencing with the June 1964 issue which also contains particulars of weighted average minimum wage rates and index numbers for the principal industry groups in each State. Considerations of space preclude the publication herein of revised figures for each of these groups in each State, but these are available on request.

6. The Minimum Wage Rate Index is based on the occupation structure existing in 1954. Weights for each industry and each occupation were derived from two sample surveys made in that year. The first was the Survey of Awards in April, 1954, which showed the number of employees covered by individual awards, determinations and agreements, and provided employee weights for each industry. This survey was also used as a basis for the Survey of Award Occupations in November, 1954, which showed the number of employees in each occupation within selected awards, etc., in the various industries thereby providing occupation weights.

7. The minimum wage rates used in the index are for representative occupations within each industry. They have been derived entirely from representative awards, determinations and agreements in force at the end of each period commencing with March, 1939, for adult males and March, 1951, for adult females. The index for adult males includes rates for 3,424 award designations. However, as some of these designations are operative within more than one industry, or in more than one State, the total number of individual award occupations is 2,322. For adult females the corresponding numbers are 1,103 and 518. By use of the industry and occupation weights derived from the surveys described above, these rates were combined to give weighted averages for each industrial group for each State and Australia. Because of coverage difficulties the rural industry is not included in the index. Shipping and stevedoring is also excluded from hourly wage rates and index numbers because definite particulars for the computation of hourly wage rates are not available for this industry.

8. Because the indexes are designed to measure movements in prescribed minimum rates of "wages" as distinct from "salaries", awards, determinations or agreements relating solely or mainly to salary earners are excluded.

9. In ascertaining from awards, etc., the wage rates for representative occupations, it was found in some cases that an occupation selected as representative in the base year (1954) did not exist in earlier years. In such cases another occupation with the same marginal rate of wage was chosen from the same award and variations in the wage rates for this occupation were taken to be representative for the earlier period.

10. Since 1954 the industry structure in Australia, and particularly in some States, has been undergoing a degree of change which over a period is likely to have some effects on the index. Generally the effect of new or expanding industries on the index is not significant, because occupations in such industries can usually be covered by existing awards, and the wage rates for the new occupations conform very closely to those for existing occupations. Occasionally, however, an entirely new award is made to cover a new industry, and in such cases occupations from the new award are introduced into the index whenever such action is warranted by the number of employees in the industry. By these means it has been possible for the occupations in the index to be kept, as nearly as may be, continuously representative and for a high degree of comparability to be preserved over a long period.

11. Weighted averages of the components of the total minimum weekly wage rate, i.e., basic wage, margin and loading, are calculated separately for adult male employees covered by Commonwealth awards, etc., and for those covered by State awards, etc. These particulars are published in Table 9 of this bulletin. Relevant definitions are as follows:-

"Commonwealth awards, etc." include awards of, or agreements registered with, the Commonwealth Conciliation and Arbitration Commission, and determinations of the Commonwealth Public Service Arbitrator.

"State awards, etc." include awards or determinations of, or agreements registered with, State industrial tribunals, together with certain unregistered agreements, where these are dominant in the particular industries to which they refer.

"Basic wage" rates are weighted averages of the rates prescribed in awards, etc., for the occupations included in the index for each State. For industries other than mining, metropolitan basic wage rates have generally been used. However, there are a number of occupations for which basic wage rates other than the metropolitan rate are prescribed. Also in some States at various times, State Government employees under Commonwealth awards have been paid State basic wage rates, and the basic wage rates of some employees have been subject to automatic quarterly adjustments while those of other employees within the same jurisdiction have remained unchanged. In all such cases the basic wage rate actually paid is used in tables herein. For these and other reasons, the weighted average basic wage rates shown in the tables in this bulletin differ, in the majority of cases, from the metropolitan basic wage rates shown in other Bureau publications.

"Margins" are minimum amounts, in addition to the basic wage, awarded to particular classifications of employees for features attaching to their work, such as skill, experience, arduousness or other like factors.

"Loadings" include industry loadings and other general loadings prescribed in awards, etc. for the occupations included in the index.

12. The proportion of employees covered by Commonwealth and State awards, etc., varies considerably as between States. In addition, the proportions of employees engaged in the respective industries differ from State to State. As a result there are relatively wide differences between the weighted average amounts of margins and loadings in the several States.

13. The wage rates shown in this bulletin should not be regarded as actual current averages, but as indexes expressed in money terms, indicative of trends. Neither the wage rates nor the corresponding index numbers measure the relative level of minimum wages as between States.

TABLE 1. - MINIMUM WEEKLY WAGE RATES : ADULT MALES, ALL GROUPS (a)

Weighted average minimum weekly rates payable for a full week's work (excluding over-time), as prescribed in awards, determinations, etc., and index numbers of wage rates.
